

Pedro Antonio González Martínez

Full-Stack Engineer · Community Lead · Mentor

Cancún, México | ✉ pgonzalez@post.com | 🔗 github.com/pedroagont, linkedin.com/in/pedroagont, pedroagont.com

Professional Summary

Full-Stack Engineer and Community Leader with 10+ years of experience in software engineering, artificial intelligence, physical computing, and technical education. Proven ability to design, build, deploy and scale full-stack systems using Node.js, Python, Ruby, React, PostgreSQL, MongoDB and cloud platforms. Experienced in GovTech, data analytics, IoT, and community-driven technology initiatives. Track record of leading cross-functional teams, mentoring developers, and collaborating with governments, universities, startups, and international organizations including the United Nations, World Economic Forum, MIT Media Lab, Harvard Business School, Internet Society, and Salzburg Global.

Core Skills

- AI-Powered Full-Stack Systems
 - Software Architecture & Systems Design
 - GovTech, Smart Cities & Data Visualization
 - Physical Computing, IoT & Robotics
 - Progressive Web Apps & 3D Web
 - Technical Education, Mentorship & Curriculum Design
 - Community Building & Ecosystem Development
 - Remote & Cross-Cultural Team Leadership
-

Professional Experience

AI Tech Lead Consultant & GovTech Data Analyst

Technical Secretariat, Gobierno Digital (Cancún/Remote) · 2025–2026

- **Technical lead for AI-driven analytics team of 8 people** supporting public-sector decision-making.
- Designed and implemented dashboards and AI-chatbot features through team workflows using **git, Node.js, React, JWT, Leaflet, Recharts** and **OpenAI** software development.
- Integrated **Power BI** and **Looker Studio** pipelines for actionable insights in **smart-city initiatives**.

Senior Full-Stack Mentor, Instructor & Technical Interviewer

Lighthouse Labs Inc. (Canada/Remote) · 2021–2025

- **Trained 40+ cohorts across Canada** through intensive **Node.js, React, PostgreSQL, and Ruby on Rails** software development programs, including a special group with University of Guelph, Ontario.
- Led **5,600+ hours of 1:1 mentoring, projects code reviews, and technical interviews**.
- Supported early-career engineers transitioning into industry-ready roles.

Full-Stack Instructor & Community Lead

DEVF (Latin America/Remote) · 2018–2021

- Delivered **Node.js, Express, React, MongoDB** software programs for **120+ developers across Latin America**.
- Helped grow one of the region's most active developer communities with **25+ hackathons and tech activities**.
- Created educational content and live learning experiences for social media.

Innovation Experience Manager

Tech Garage Innovation Park · 2016–2018

- Led Cancún's first technology park, organizing **150+ events**, reaching **3,000+ participants** and **contributing to launching 12 new tech startups**.
- Delivered **IoT & AI prototypes with Raspberry Pi, Arduino, ESP8266, and cloud integrations**.
- Partner with Google, Uber and Microsoft to **boost the local startups and creators regional ecosystem**.

Community Lead Internship

Microsoft Innovation Center Cancún · 2015–2016

- **Designed and delivered 9 workshops and technology programs** focused on entrepreneurship and digital skills.
-

Selected Projects

Products, Branding & Platform Development

- **TicketFlyers.com, d3stinations.world** - travel booking platforms (web development + Travelepayouts API).
- **MyDoctorAway.com** - medical-on-demand hospitality platform (branding + web development).
- **Coquelicot.online** - Phone cases e-commerce platform for a French brand (Shopify + Webflow).
- **CentroEvaluador.mx** - Corporate learning platform (branding + Wordpress).
- **Dozens** of production websites, platforms and digital brands with accessibility, SEO, responsive design and security.

3D & Interactive Systems

- **Cancún Beach Multiplayer Simulator** - real-time 3D and AI environment (Three.js, Socket.IO, AI).
- **Hand Rush** - gesture-based 3D game using computer vision (ml5.js Hand Pose).
- **Skydive Collector** - motion-controlled 3D game using Device Orientation API.

Robotics & Physical Computing

- Arduino, Raspberry Pi and LEGO Mindstorms IoT mobile robotics showcased at **UN STI Forum 2018**.
- Algorithms, automation and human-machine interaction research projects in Osaka, Japan exploring **motion, muscle and brainwave data capture**.
- ESP32 microcontrollers with custom C++ firmware; signal processing, ML classifiers.
- Real-time synchronization via **Node.js, JWT, Socket.IO, OpenAI**, visualized in a **React PWA**.

Education & Fellowships

- **Connecting Technologies: Talent & Innovation Fellowship** - Salzburg Global Seminar (Salzburg, Austria 2024)
- **Certificate, Emergent Future Technologies** - MIRAI Innovation & Research Institute (Osaka, Japan 2023)
- **Certificate, High-Impact Entrepreneurship** - TecniA Innovation Park, Anáhuac Mayab (Mérida, México 2016-2017)
- **B.Sc., Mechatronics Engineering Degree** - Tecnológico Nacional de México (Cancún, México 2011-2016)

Global Impact & Recognition

- Connected **30+ rural schools and communities** around México with no prior internet access through Kaanbal.org (co-founder non-profit).
- Founder Member & Curator Alumni, **Global Shapers Community, encouraging youth local leaders in global action**.
- Speaker & contributor at **United Nations, MIT Media Lab, Harvard, TU Berlin**.
- Participant, **World Economic Forum GS Annual Summit @ Geneva & Plan México @ CDMX** (2025).
- Grants and recognition from **Internet Society, Government of México**, and regional authorities.

Languages

- Spanish - Native
- English - Bilingual (C1, IELTS 7.5)

Tech Stack

- **Frontend:** HTML, CSS, JS, jQuery, React, Next.js, Bootstrap, TypeScript, Tailwind, Three.js, p5.js
- **Backend:** Node.js, Express, Python, Flask, Ruby on Rails, Cookies, JSON Web Tokens, REST APIs, GraphQL
- **Databases:** PostgreSQL, MySQL, MongoDB, MariaDB
- **Cloud & DevOps:** DigitalOcean, Docker, Kubernetes, AWS, GCP, Azure, Netlify, Render, Hostinger
- **Testing:** Mocha, Chai, Jest, Cypress, react-testing-library, vitest, Storybook, Playwright
- **AI Tools:** OpenAI, Deepseek, Claude, Replit, Lovable, Replit, n8n, ml5, Tensorflow
- **Payments and APIs:** Stripe, Paypal, Zapier, Travelepayouts, Cloudinary
- **Content Management Systems (CMS):** Wordpress, Shopify, Webflow
- **Hardware & IoT:** Electronics, Arduino, Raspberry Pi, ESP8266, ESP32, M5 Stack
